

Loreto “Jeon” Saquilabon Jr.

Full-Stack Developer & Automation Engineer

Lapu-Lapu City, Cebu, Philippines • bertulfojeon@gmail.com • +63 968 4333 479

SUMMARY

Self-taught full-stack developer and automation engineer who has shipped **six production web/SaaS applications end-to-end** — frontend, backend, authentication, payments, automation, and deployment. Specialized in Next.js + TypeScript front ends backed by Supabase/Firebase, plus Python automation that integrates trading platforms, Telegram, and web-scraping pipelines. Comfortable owning a product from blank repo to live, paying-user deployment on Vercel.

TECHNICAL SKILLS

Frontend: Next.js (14/15/16), React (18/19), TypeScript, Tailwind CSS, Framer Motion, Recharts, shadcn/ui, responsive UI

Backend: Node.js, Supabase (PostgreSQL), Firebase (Firestore/Auth), SQLite, REST APIs, WebSockets, server actions, auth systems

Automation & Scripting: Python, Telethon (Telegram), MetaTrader 5 API, Cheerio / BeautifulSoup web scraping, cron scheduling, Electron

Payments & Integrations: Stripe, PayPal SDK, Shopify API, Cloudinary, Brevo, Sentry

Platforms & Tools: Vercel, Cloudflare, Git / GitHub, Playwright

Design: Graphic design, vector / logo design, UI/UX, data visualization, Figma, Adobe Illustrator

PROJECTS

TG Auto Trader — All-in-One Trading SaaS Platform

[Next.js 14](#) · [TypeScript](#) · [Firebase](#) · [Supabase](#) · [Python](#) · [MetaTrader 5](#) · [Telegram](#) · [PayPal](#) · [Electron](#)

Desktop application (Windows) · Demo & screenshots on portfolio

- Built a full-stack trading SaaS end-to-end: a Next.js/TypeScript web dashboard plus a Python desktop agent that auto-executes Telegram trade signals on MetaTrader 5 in real time.
- Engineered real-time desktop↔web sync via Firebase/Supabase, with DST-aware session analytics, equity curves, and 20+ analytics views built on Recharts.
- Implemented MT5 copy trading (master→follower), psychology-tagged trade journaling, multi-account management, and PayPal subscription billing.

TradesByMerc — Trading Mentorship & Learning Platform

[Next.js 16](#) · [Supabase](#) · [Tailwind CSS](#) · [Stripe](#) · [Brevo](#) · [Cloudinary](#) · [@react-pdf/renderer](#)

Live: tradesbymerc.com

- Developed a mentorship LMS on Next.js 16 + Supabase: multi-module courses, a quiz builder, and automated PDF certificate generation.
- Built a role-based admin suite, VIP membership tiers, Stripe billing, and Brevo email campaigns, with a Cloudinary image pipeline using dedup hashing.

Resolute AI — Cinematic Corporate Marketing Site

[Next.js 16](#) · [React 19](#) · [TypeScript](#) · [Framer Motion](#) · [Playwright](#)

Live: resoluteaiph.vercel.app

- Built a high-performance corporate marketing site with a cinematic video hero and scroll-driven animations.
- Optimized Core Web Vitals — moved CSS animations off the main thread, compressed hero video (VP9, ~30% smaller), and verified responsive layout at five breakpoints with an automated Playwright screenshot harness.

SMC Course — Smart Money Concepts Education Platform

[Next.js 15](#) · [React 19](#) · [Supabase](#) · [Tailwind CSS](#) · [Framer Motion](#) · [Zod](#)

Live: [freemartmoneycourse.online](#)

- Built a trading-education platform with lesson progression, quizzes, progress tracking, certificates, and a community forum.
- Added bilingual (English / Taglish) content, Google OAuth and magic-link auth, and an admin content-management panel.

JeonScraper — Shopify Competitive-Intelligence App

[Electron](#) · [Node.js](#) · [Cheerio](#) · [SQLite](#) · [node-cron](#) · [Sentry](#)

Live: [jeonscraper.vercel.app](#)

- Built an Electron desktop app that monitors competitor Shopify stores — scraping products, prices, and stock, detecting changes, and alerting via scheduled cron scans.
- Added multi-currency pricing (~30 currencies), SQLite storage, CSV/Excel export, and robots.txt compliance; shipped with a marketing site and a \$29/mo subscription tier.

Midnight Vibes Live — Concert Event & Ticketing Landing Page

[TypeScript](#) · [Vite](#) · [shadcn/ui](#) · [Tailwind CSS](#)

Live: [midnightvibeslive.vercel.app](#)

- Built a high-energy event landing page for a live concert: animated hero, real-time countdown timer, tiered VIP ticket selection, and a ticket-purchase call-to-action flow.

EXPERIENCE

Freelance Full-Stack Developer — Independent

2020 – Present

- Design, build, and deploy production web and SaaS applications end-to-end for trading, e-commerce, and education niches.
- Own the full lifecycle: UI/UX, frontend, backend, database, auth, payments, automation, and Vercel deployment.

Customer Service Representative — Teleperformance

2017 – 2019

- Resolved customer issues efficiently while meeting handling-time, resolution, and CSAT targets.
- Built communication and problem-solving skills now applied to requirements gathering and user support.

Data Entry Specialist — Bureau of Customs, Sub-Port Mactan

2015 – 2017

- Accurately entered and maintained large volumes of records; generated and formatted reports for operations and decision-making.
- Developed the attention to data accuracy that underpins my database and analytics work today.

Graphic Designer (Part-time) — Kwayyu Tailoring & Printing Shop

2015 – 2017

- Created vector graphics and logos on tight deadlines — the design foundation behind my product UI/UX work.

EDUCATION
